

TRU-LINE®

Laser Wheel Alignment Systems

TL-12 Deluxe

4 great US-made products make for a complete alignment solution!

The complete TL-12 system, Race Ramps front and rear stands, QSP slip plates and turn tables, all for

MSRP \$7250

The cost of ownership on the TL-12 can not be matched by any system in the market. Our units will do everything a system of \$40K will do and more. We have no maintenance contracts. The TL-12 is completely portable and can handle any vehicle that rolls up to your shop from small to large.

With the new TL-12 Deluxe package you have everything you need to do an alignment in your shop. The system works with 2 post, in ground and drive-on lifts. If your lifts are tied no worries just move the TL-12 to where you need it. If the vehicle is too large to fit in your shop do the alignment in the parking lot.

Our system is not sexy, no bells no whistles. All those bells and whistles cost you money. The TL-12 just does the job. It can adapt to almost any wheel and align almost any configuration.

We are **all American-made**.
