

Trailer Wheel Alignment Tracking -- TT-14

The TT-14 Trailer Wheel Alignment Tracking is a simple and fast trailer tracking system. Tru-Line has decades of experience in the wheel alignment industry and is a product **100% made in the USA**. The TT-14 evolved from our TLT-12 Heavy Truck and Trailer full system when customers were looking for a fast trailer check product so the TT14 was born. Same accuracy, simplicity, portability and durability as all Tru-Line products.
